

IN THE ABSTRACT:

Following the Claims, please add the Abstract as follows:

--Abstract of the Disclosure

This invention relates to a method for improving a digital image for displaying an improved image on a display. According to the method, an instantaneous property of the display; a property of the digital image; and parameters for an image processing method are determined. The parameters are determined at least partly on the basis of the instantaneous property of the display, and the property of the digital image. Then the digital image is processed by means of the image processing method, while applying the parameters. The invention also relates to a mobile device as well as a display unit, which are arranged to employ the concept of the method.
